

The Acoustic Wood Designs Panelized Linear Wood Ceiling System offers a visually attractive and easily installed wood ceiling system. Standard panel lengths are nominally 6', 8' or 10' for solid wood. Panels can also be produced with a 3/4" particle board or MDF core and applied surface veneer, which may also have a matching veneer edge band on the sides of the linear planks.

KEY SELECTION FEATURES

- Cost effective wood ceiling
- Fast and simple installation using standard heavy duty suspension grid familiar to all experienced acoustical ceiling installers
- Every panel is downward accessible
- Plank widths 3-3/4" and 5-1/4" with 3/4" reveal between planks
- Popular range of standard solid wood specie available
- Wide range of wood veneer finishes on 3/4" particle board or MDF core
- Range of edge trims for floating ceiling conditions
- Optional black scrim can be applied to the rear of each panel
- Interior or exterior finishes available

Optional notched wood backers for added stability.

Note: Value Engineering Option - Poplar with a custom stain

ACOUSTICAL PERFORMANCE

AWD Panelized Linear Open Wood ceilings acoustical performance varies according to width of board and reveal width. Typically linear open wood ceilings systems with an acoustical pad can be expected to achieve an NRC of greater the 0.65.

FIRE RETARDANCY

AWD Panelized Linear Open Wood ceilings can be manufactured to achieve ASTM E84 Class 1 or Class A retardancy.

COMPLIANCE WITH SIESMIC CODES

AWD Panelized Linear Open Wood ceilings when installed on to a seismic code compliant suspension grid will satisfy seismic code requirements. Consult local codes or a licensed engineer for any additional requirements.

SUSTAINABILITY

AWD Panelized Linear Open Wood ceilings are manufactured responsibly utilizing sustainable raw materials.
